WORK EXPERIENCE

Base Power | *Factory Construction Intern* *Austin, TX | May 2026 – Aug 2026*

- Engineered the master layout for a 9 GWh battery manufacturing plant and support facilities, collaborating across NPI, R&D, and Reliability teams in AutoCAD to map end-to-end material flows, drive aisles, and space allocations.
- Owned facility integration and vendor procurement, defining fire safety requirements for test chambers, leading racking system buyouts based on supply chain capacity needs, and planning dedicated NPI/R&D auxiliary spaces.
- Established foundational construction and engineering operations for the startup team, authoring standardized SOPs, OCRs, JHAs, and electrical commissioning frameworks to streamline owner-architect-GC workflows.

Tesla | *Construction Project Management Intern* *Austin, TX | Jan 2025 – Apr 2025*

- Directed cross-functional Quality and Design teams for high-sensitivity industrial manufacturing facility projects.
- Managed contractors to ensure strict adherence to project specifications, safety guidelines, and schedule baselines while tracking and reporting variances.

PCL Construction | *Field Engineer Intern* *Denver, CO | May 2023 – Aug 2023 | May 2024 – Dec 2024*

- Supported Project Managers and Senior Superintendents across water treatment, educational, airport expansion, and $200M luxury resort projects, focusing on MEP and architectural scopes.
- Coordinated owners, architects, consultants, and subcontractors via CRM tools, BIM 360, Bluebeam, and StructionSite to streamline field communications and submittal/RFI workflows.
- Managed on-site logistics, procurement, trade scheduling, first-work-in-place inspections, and strict regulatory compliance (LEED, EPA, USDOT).

Comp-U-Dopt | *Instructor* *Houston, TX | May 2022 – Jan 2023*

- Delivered K-12 STEM education across 8+ Houston-area locations for a non-profit dedicated to bridging the digital divide.
- Taught foundational principles in circuitry, 3D modeling (Tinkercad), and programming using Micro:bit, MakeCode, Scratch, and C++ on the Arduino IDE.

EDUCATION

University of Houston *B.S., Mechanical Engineering Technology | Expected Spring 2028*

- **Honors:** Houston Community College Dean's List | National Society of Leadership and Success

SKILLS & CERTIFICATIONS

- **Technical Skills:** AutoCAD, SolidWorks, Fusion 360, BIM 360, ACC Build, Bluebeam Revu, StructionSite, MATLAB, C++, CNCBase, CNC Numerical Control, Surveying
- **Relevant Coursework:** Automated Manufacturing Systems, Lean Manufacturing, Fuel Cell Applications, Thermodynamics, Electrical Circuits, Materials and Processes, Engineering Graphics, Statics
- **Certifications & Operations:** Construction Safety (HSE, OSHA), HISD Work Eligible, Subcontractor & Architect Coordination, Data Visualization (Excel, MATLAB), Process Development, Infrastructure Coordination
